

(A)

Fatty acid metabolism

PPAR signaling pathway

AMPK signaling pathway

Fatty acid biosynthesis

Adipocytokine signaling pathway

cAMP signaling pathway

AGE-RAGE signaling pathway in diabetic complications

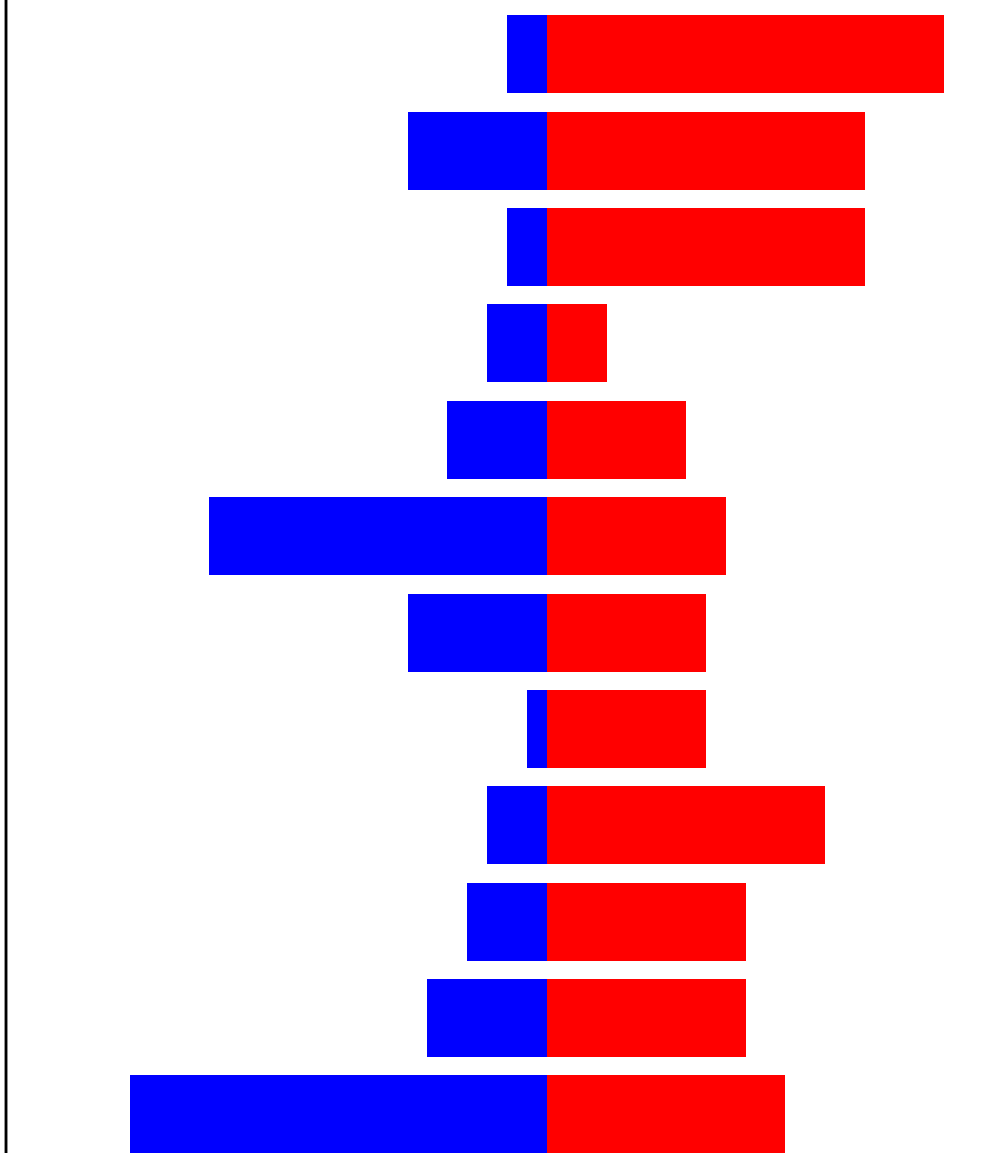

Regulation of lipolysis in adipocytes

Insulin signaling pathway

Insulin resistance

FoxO signaling pathway

Cytokine-cytokine receptor interaction

(B)

Fatty acid metabolic process

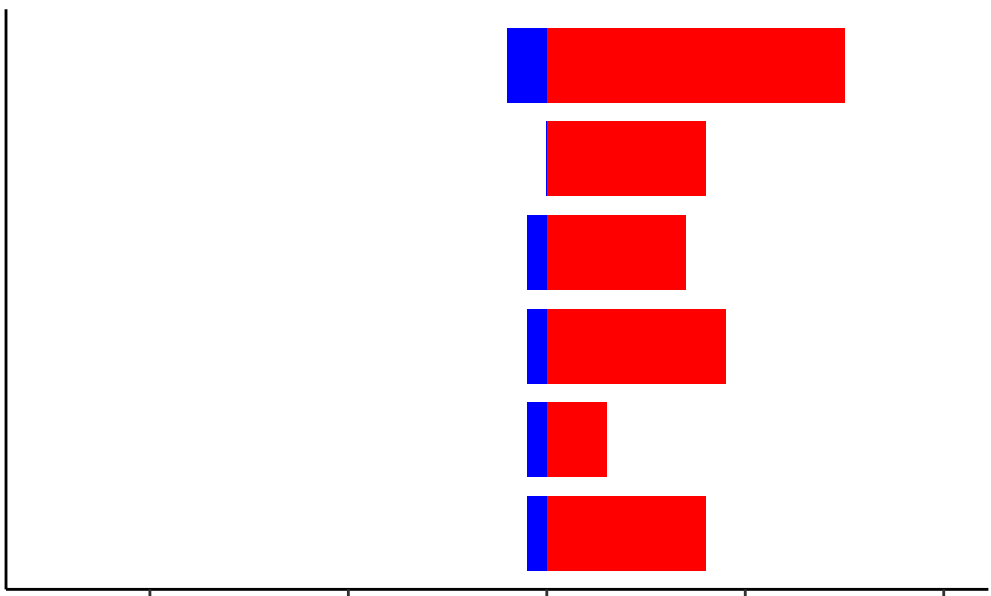

Positive regulation of cold-induced thermogenesis

Fatty acid biosynthetic process

Temperature homeostasis

Positive regulation of fatty acid metabolic process

Regulation of cold-induced (adaptive) thermogenesis
